

Water Smart Irrigation Professional Training and Certification

The Water Smart Irrigation Professional Program was created by Landscape Ontario, in partnership with the Region of Peel and York Region. Water Smart Irrigation Professionals, (WSIP) have specialized training in irrigation system efficiency, assessment and maintenance services. WSIP contractors are industry leaders committed to sustainable irrigation management.

Did You Know

- Over watering grass and plants is counter-productive. Studies showed that, on average, irrigation systems used 55% more water than recommended to keep landscapes healthy and green.
- Smart and central controllers can reduce your irrigation costs by 30-50%. An assessment of your irrigation system will also determine if installing one of these controllers is the right thing for you.
- During the year water demands are highest in the summer and irrigation is commonly accepted as the main contributor.
- Clients that have a certified WSIP contractor can save an average of 40-50% on their irrigation water use, while maintaining a healthy and lush landscape.
